PEEK INTO THE FUTURE: COSMOS, TECHNOLOGY, INNOVATION

What is Russia world known for?

Of course for the first cosmonaut that flew to space in the world and generally due to Russian role in space exploration.

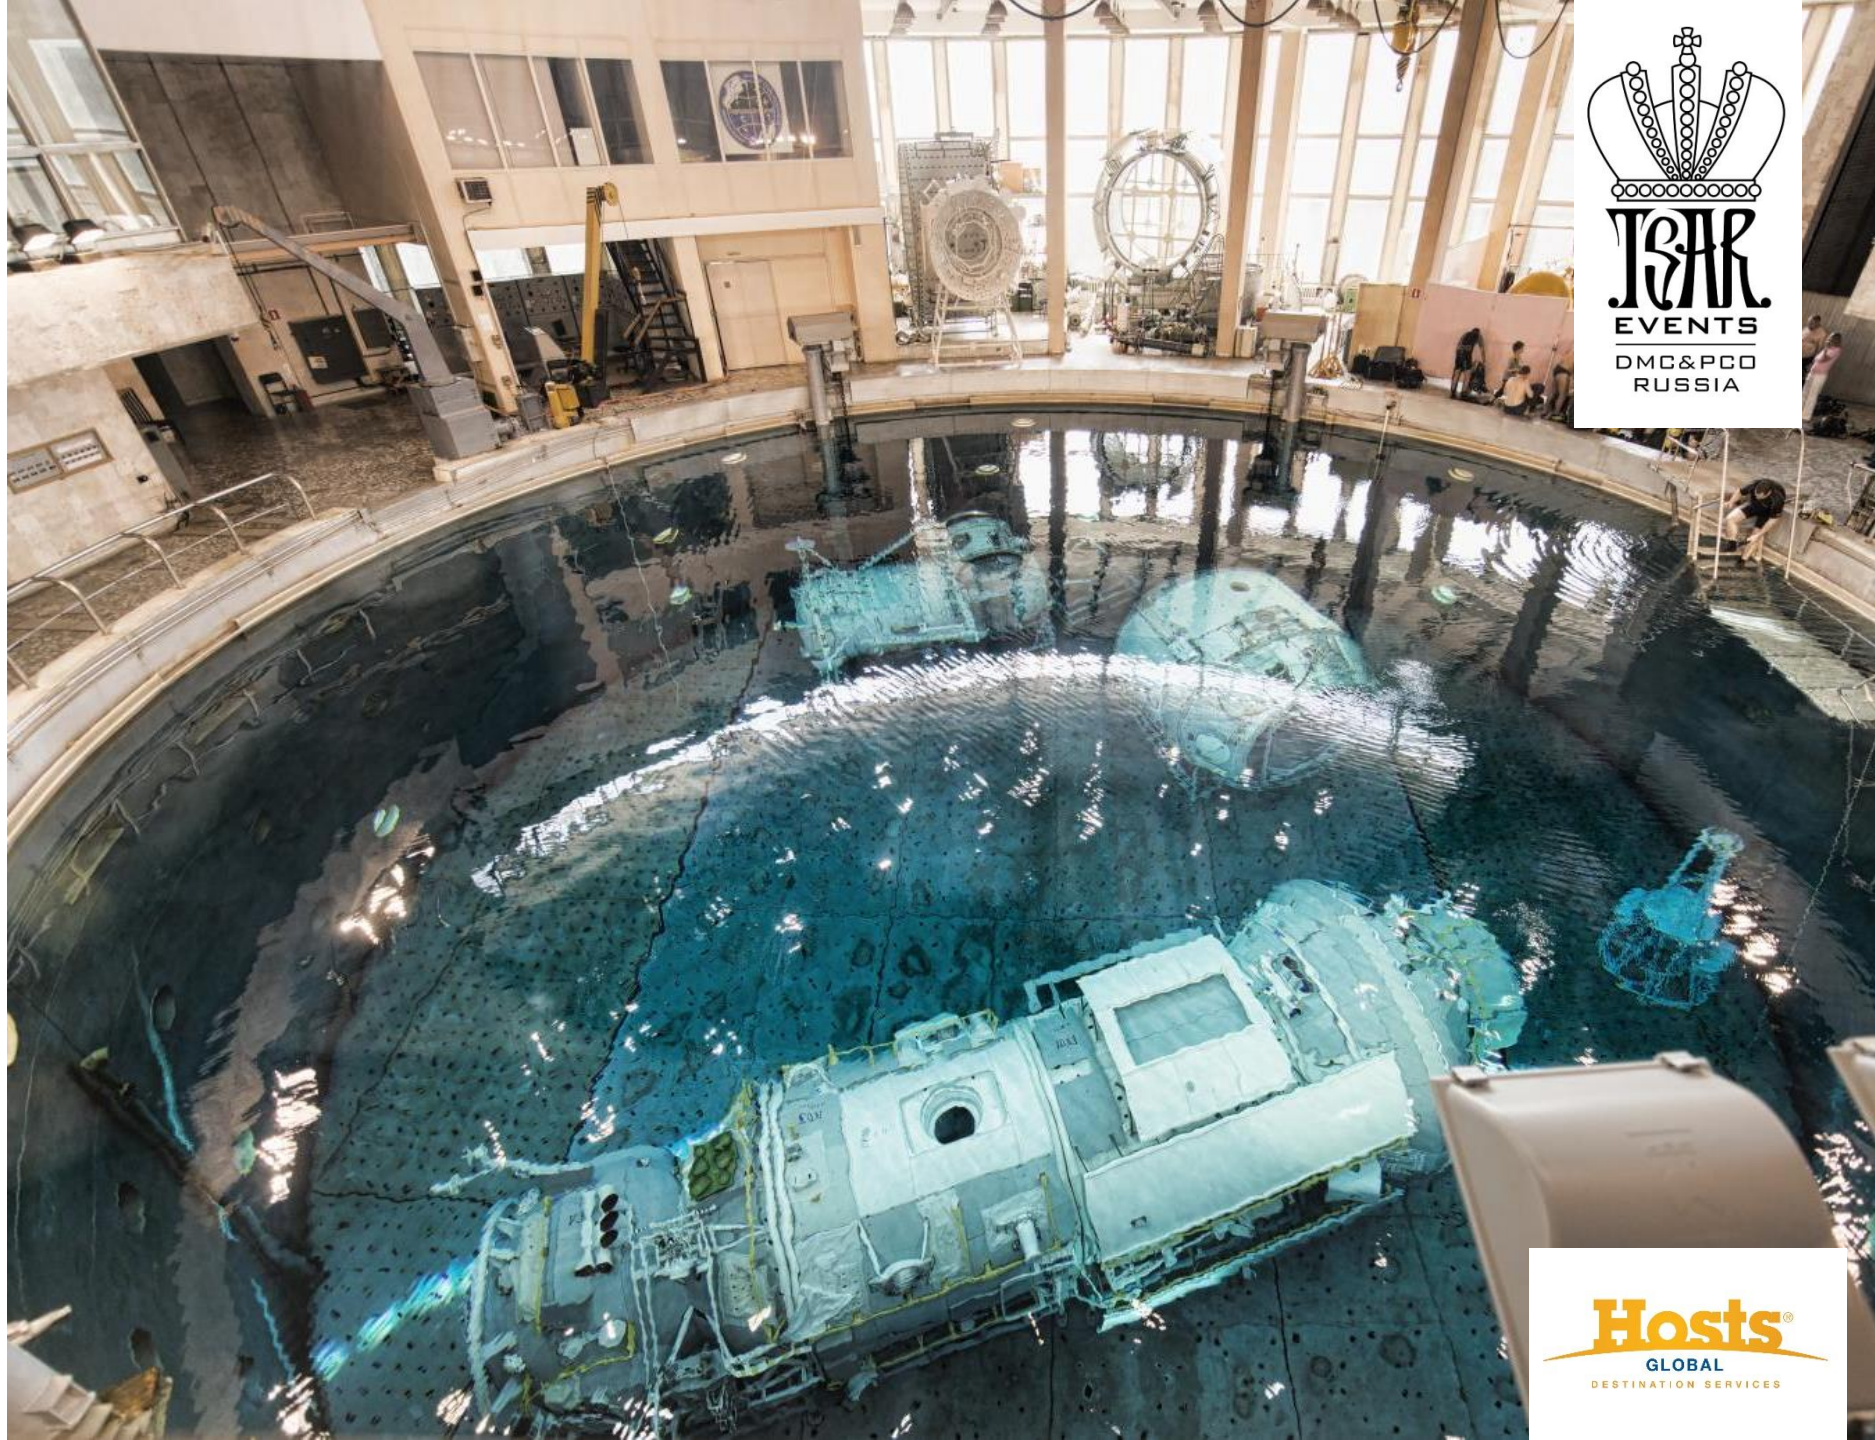

We are really proud of these achievements, that's why there are many museums, planetariums and venues referred to the topic of space in Russia.

STAR CITY

Here is one of the most significant space facilities in Russia. It is located in the picturesque suburbs of Moscow in a distance of 30 km. There are located The Cosmonauts' Training Center named by legendary Yuri Gagarin and the same-named museum in the territory of Star City. Both objects are unique and of a great interest with the visitors from various countries. It is the only location in the world, where the one can try Zero Gravity Flight and many other activities, which are available only for cosmonauts!

www.tsar-events.com

Meeting with Cosmonaut

Star City is a unique and world-famous center for cosmonaut's training as well as their living and working residence location. Do not miss an opportunity to meet and have an exciting conversation with a real cosmonaut!

During this informal meeting, the guests can ask cosmonaut anything they would like to know about Space. After the meeting, it is possible to have cosmonaut's autographs.

ZERO GRAVITY FLIGHT

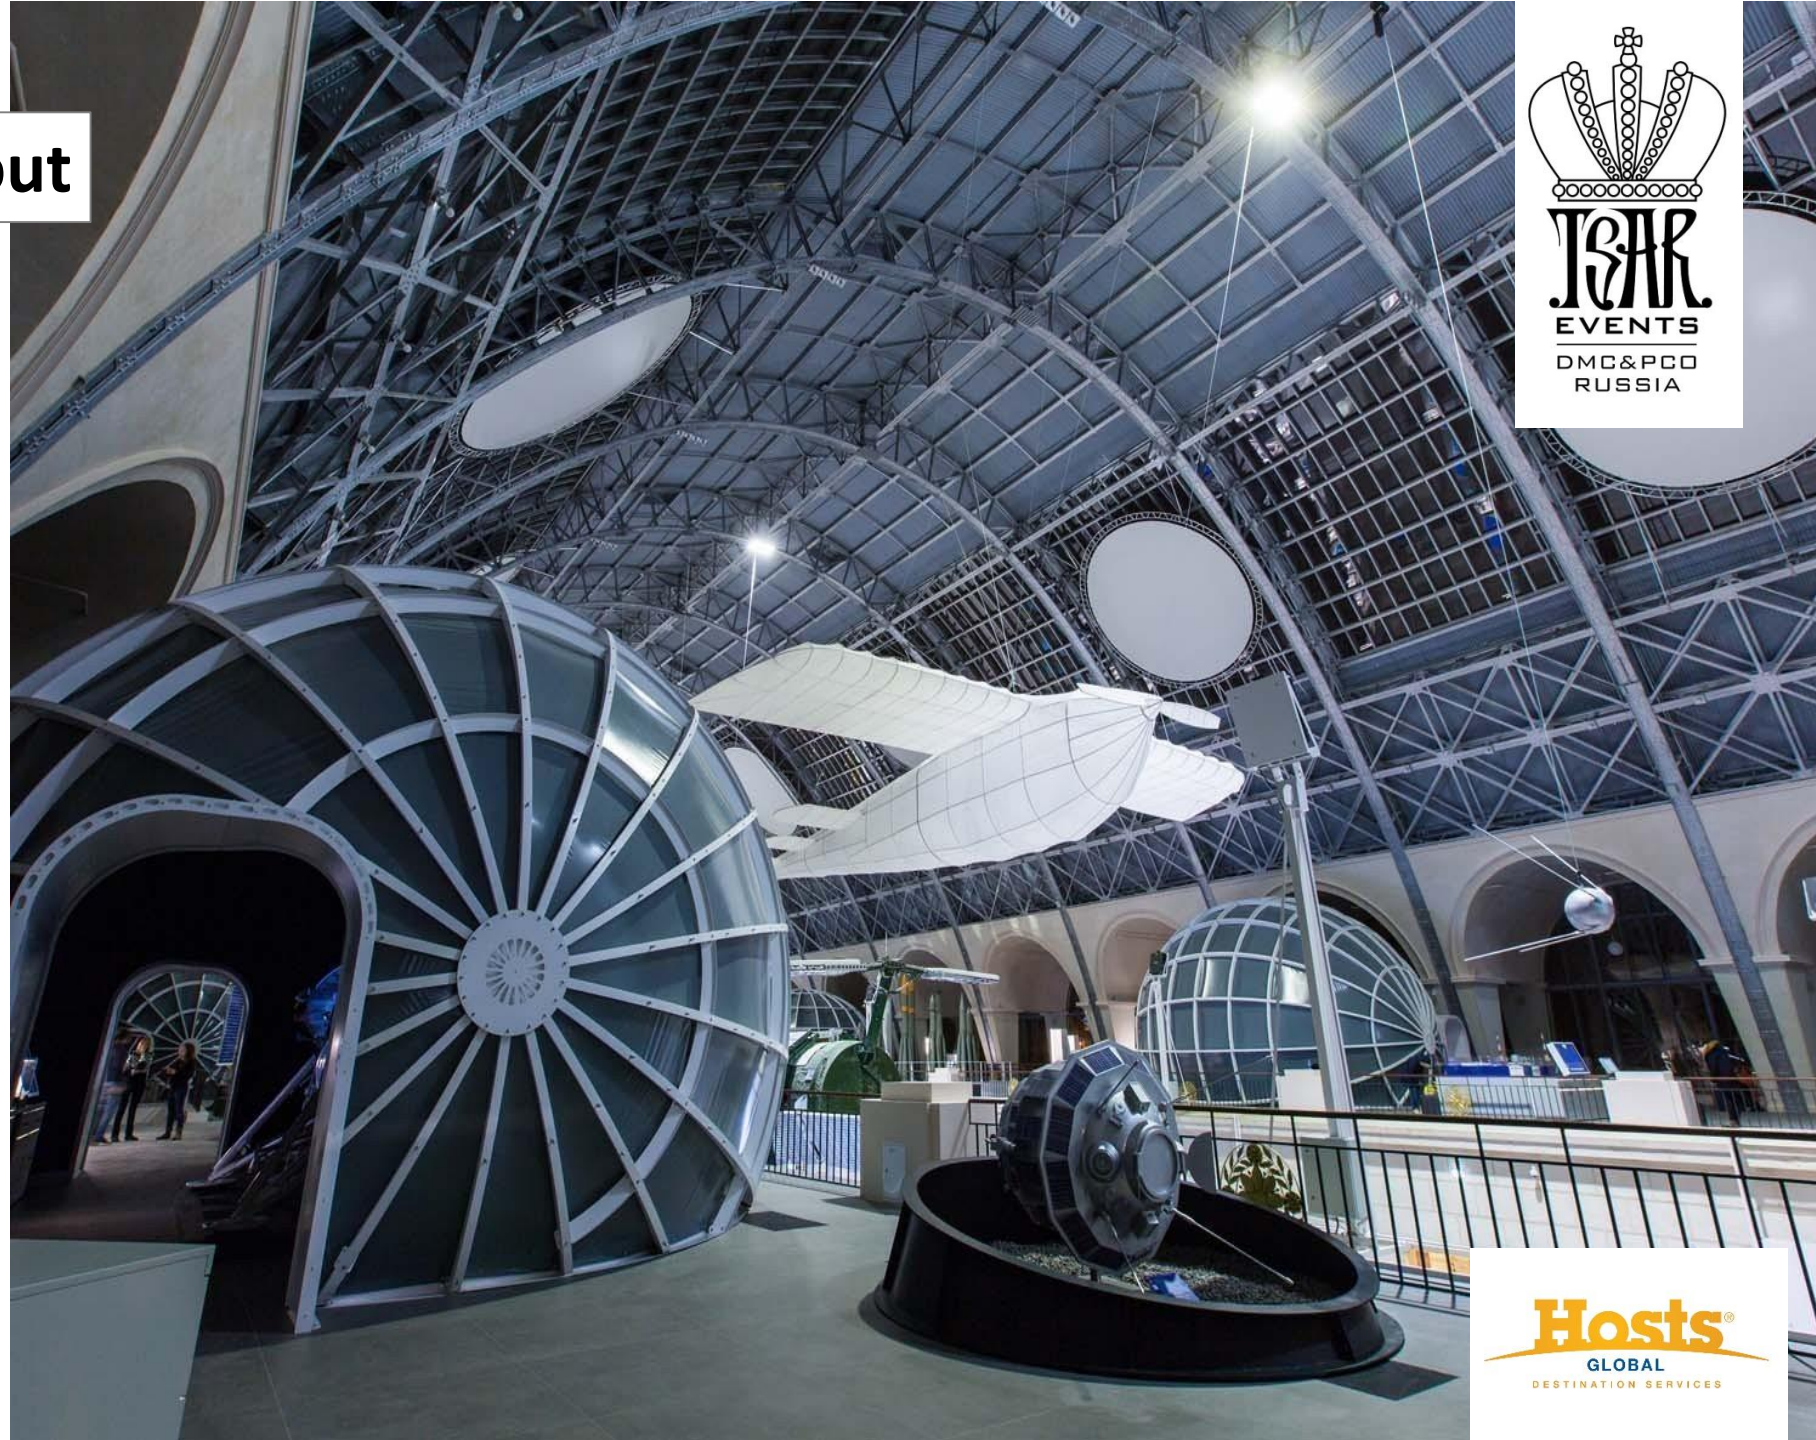

COSMOS Pavilion

COSMOS Pavilion: About

(Cosmonautics and Aviation Centre) was first opened to the general public in the renovated historic Pavilion No. 34 on April 13, 2018. The Cosmonautics and Aviation Centre is a joint project of the Moscow Government and Roskosmos to popularize the achievements of the Russian space.

COSMOS Pavilion: Possible activities

We recommend to visit
Cosmos Pavilion during:

- Treasure Hunt (as one of the stations);
- A stop during sight-seeing tour;
- Place of interest during Soviet Theme tour or Space Theme tour with an excursion inside;
- A venue for Gala Dinner.

COSMOS Pavilion: Exposition

The Centre's exposition features more than 120 unique exhibits of aircraft and spacecraft which have never been exhibited in museums.

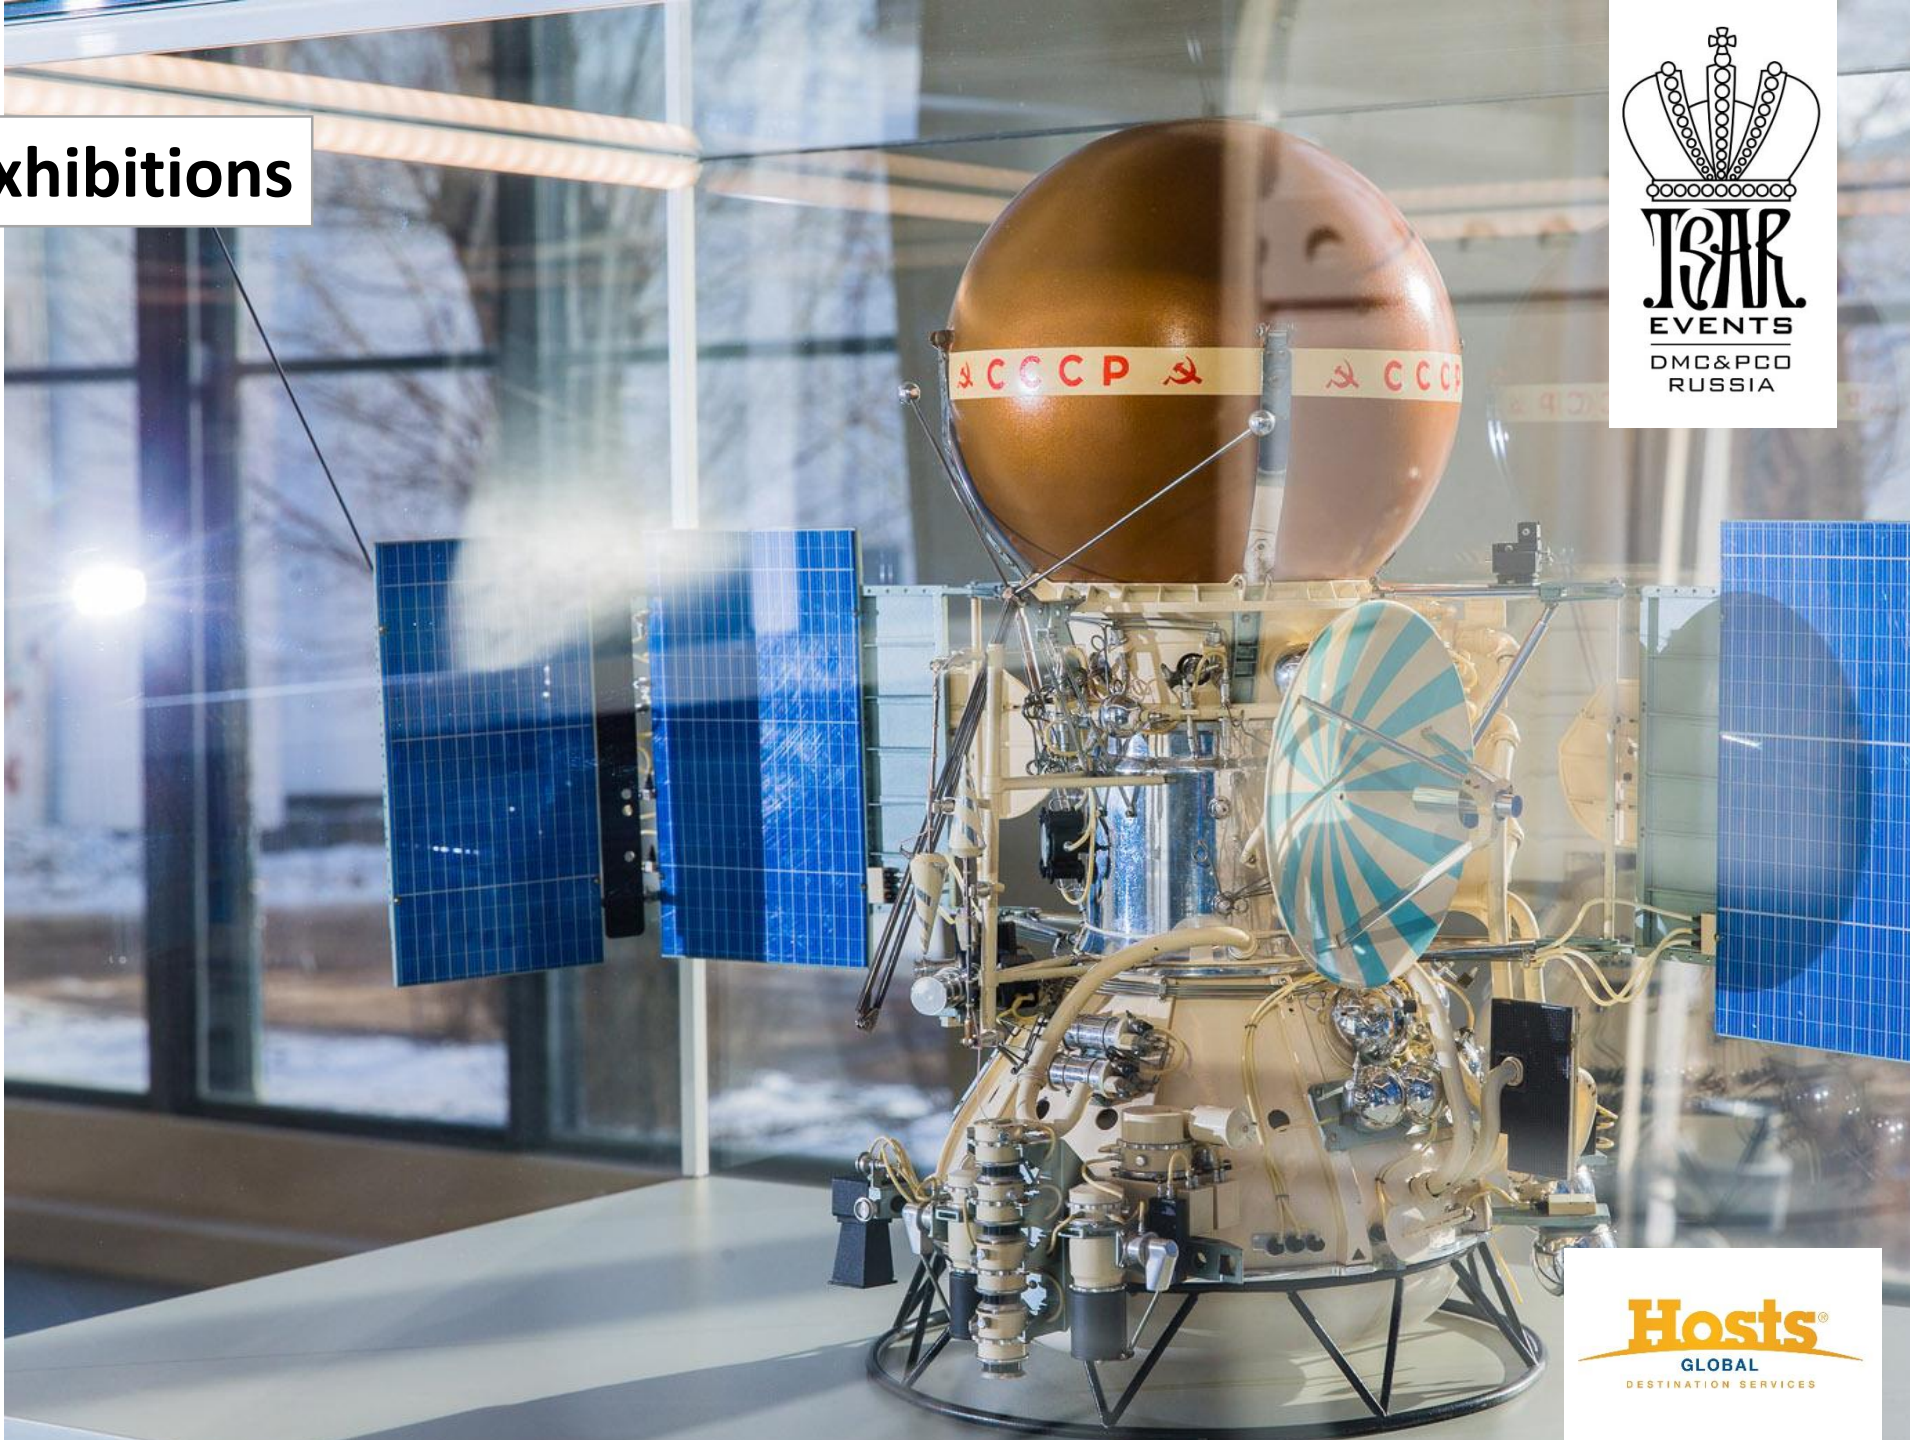

The area under the dome houses game simulators, the "Monolith" and "Cosmic sphere" exposition modules, and a virtual reality hall with the external form of a huge sphere. There you can watch a rocket launch or see Earth from space.

COSMOS Pavilion: Exhibitions

Here you can find:

- 1) A model of the artificial Earth satellite Sputnik-1;
- 2) Mir orbital complex (scale 1:1) ;
- 3) Full-scale example of the Soviet liquid-propellant rocket engine RD-170;
- 4) MAKS orbital aircraft (multi-purpose aerospace system);
- 5) Luch-5A satellite-retransmitter.

MOSCOW PLANETARIUM

MOSCOW PLANETARIUM

The Moscow Planetarium — Russia's oldest and one of the world's largest — will turn 89 on 5 November.

There is a place in Moscow where the night sky always looks clear and velvety —the Moscow Planetarium.

Visitors can see other planets and lunar craters, learn about man's place in the Universe and listen to lectures by prominent scientists under the domed projection screen, the largest in Europe (25 m in diameter and 1,000 sq m in area).

MOSCOW PLANETARIUM

GRAND STAR HALL of Moscow Planetarium has Universarium M9 the most advanced fiberglass projection device for displaying the night sky and specially created movies. It can be used for presentations or lectures.

Capacity:

Conference Theater style

– 356 pax

Recommended for
Conference or
presentations using
Universarium M9

Prejector

MOSCOW PLANETARIUM

MOSCOW PLANETARIUM TELESCOPE HALL
